

WELCOME TO AGE IN PLACE SACRAMENTO

We work with patients who after a hospital or rehabilitation stay, desire faster recovery, more mobility, less pain, a lower level of care, better symptom management, a reducing cost of care approach, a higher quality of life for the care recipient and lower stress for the family caregiver.

If someone you love wants to continue living at the place that they have called “HOME” for a long time although they need help with personal care, exercise, wellness and supportive living activities we are here with personalized, disease specific and life enhancing care 24 hours a day, 7 days a week, all year long.

Our service plans & care programs are designed to provide a lot of care at the beginning to promote functional improvement and a decrease in the level of care so that over time, the cost of care reduces and the quality of life of the care recipient improves while lowering stress for the caregiving family. Our geriatric wellness method of care is a science-based approach to helping patients reach measurable wellness outcomes.

WE SERVE:

- ✓ Family caregivers who are tired of the frequent hospital readmissions and the revolving door between the home, hospital and rehabilitation center.
- ✓ Medical providers who want measurable wellness improvements and outcomes for their patients and healthcare consumers
- ✓ Assisted living and retirement communities who need specialized caregiving to help their residents recover faster after a medical incident
- ✓ Home health care agencies, attorneys and guardians whose patients and clients want to get better faster, remain well, vibrant, and active.
